

Hoda Oyarhoseyn

University of Tehran. the History of Science Institute & Great Islamic Encyclopedia (Tehran/Iran)

oyarhoseyn@ut.ac.ir

She graduated in civil engineering from AmirKabir University of Technology, Tehran, and graduated in the History of Science from the University of Tehran (2021) at the Master's level, and is a PhD candidate in the History of Science from there and Assistant of the Science Department of the Great Islamic Encyclopedia.

Research area: Medicine and pharmacology of the Islamic period

Her master's thesis is about the tradition of tabular (*mujadwal*) medical/pharmacological works in medieval Islam, including identification and edition of the Persian redaction (*Tahrīr*) of 'Alā'ī Maghribī's *Almanac of Drugs* (*Taqwīm al-'Adwīyah*). It was based on its Original Arabic text and its parallel texts such as *Iḳtiyārāt-e Badī'ī*. Her Ph.D. thesis is about the Arabic tradition of Dioscorides' *Materia medica*.

She is writing articles for the Great Islamic Encyclopedia since 2021 up to now, including the articles on saffron (*Za'farān*), leech (*Zālū*) and Cumin (*Zīreh*) entries & supplements to other entries.

Also, writing Articles for history of science journals, attending and presenting article about science history in Islamic world in national and international Conference such as "Common Heritage of Iran and India" (in National Documentation Center and Library of the Islamic Republic of Iran), and "First Annual Conference on the History of Science" (in Institute of the History of Science, University of Tehran). She has also participated in promotional programs on the history of science on television (the Charkh program) and radio (the program From Tehran to Andalusia), as well as the Malek Museum (the legacy of the physicians of the Islamic period, Razi and Avicenna), and the Iranian Science Association.
